SUMMARY

Data Analyst with 3+ years of experience in e-commerce and logistics operations, specializing in operational analytics and workflow automation. Proven ability to translate complex operational data into scalable dashboards, reconciliation models, and automated processes that improve efficiency and reduce costs – delivering up to 30% cost savings and 80% faster lead times. Skilled in SQL, Python, and BI tools, with experience collaborating across operations, finance, and technical teams to drive data-informed decision making. Currently pursuing a Management degree to further develop strategic business insight and lead data-driven operational improvements.

EXPERIENCE

Laku6 (Carousell Group) | Jakarta, Indonesia (Hybrid)

Operations Data Analyst

September 2023 - December 2025

- Analyzed outbound shipping and delivery workflows, identifying bottlenecks and redesigning order grouping processes to achieve an estimated 30% improvement in cost efficiency.
- Automated manual data extraction and daily operational reporting, which helped reduce lead times by up to 80% across warehouse and logistics departments.
- Conducted detailed shipping cost reconciliations with logistics partners and 3PLs, cross-referencing internal data against vendor invoices to ensure accurate billing and recover approximately 10% in operational costs.
- Supported the finance team by performing precise cost allocation calculations for upcoming billing cycles to aid in budget planning.
- Built and maintained reporting dashboards to provide management with clear visibility into key performance metrics.
- Gradually introduced new workflow systems to warehouse teams, using data to demonstrate the efficiency benefits and secure their long-term adoption.

RevoU | Jakarta, Indonesia (Remote)

Data Analytics Team Lead & Vertical Mentor

February 2023 - May 2025

- Completed an intensive full-stack data analytics program before transitioning into a leadership role as Team Lead and Vertical Mentor, demonstrating recognized growth within the organization.
- Instructed cohorts in data pipeline construction, cloud fundamentals, and analytics best practices in partnership with AWS, achieving a 4.90/5.00 performance rating.
- Provided consistent, personalized feedback to students, identifying their individual learning blocks and adjusting teaching approaches to keep them engaged and motivated.

Freelance | Jakarta, Indonesia (Hybrid)

Quantitative Analyst

May 2018 - Apr 2019

- Supported a private fund manager by translating financial strategies into automated trade execution logic, building the underlying rules and triggers that drove consistent daily operations.
- Used advanced spreadsheets to generate performance reports, perform risk management calculations, and create trade models, reducing potential portfolio losses by 10%.
- Built the automated execution framework that successfully captured a peak daily profit milestone of \$16,000 for the fund.

EDUCATION

RUDN University | Moscow, Russia

Bachelor of Management

Expected Graduation: 2029

Voronezh State University | Voronezh, Russia

Completed coursework through final semester, Applied Mathematics

2016 - 2020

SKILLS

Domain:

- *Operational & Supply Chain Analytics*: Logistics reconciliation, shipping cost allocation modeling.
- *Business Process Improvement*: Bottleneck identification, workflow automation, lead time reduction.

Technical:

- *Advanced Spreadsheet Engineering*: MS Excel & Google Sheets (Apps Script, financial modeling).
- *Data Manipulation & Querying*: SQL (Google BigQuery, PostgreSQL), Python.
- *BI & Visualization*: Interactive dashboard design and operational KPI tracking (Looker Studio, Tableau).
- *Cloud & Architecture*: AWS Cloud Fundamentals, ETL/ELT pipeline automation, algorithmic logic design.
